

ABSTRACT OF THE DISCLOSURE

chsc1

The present invention provides a DNA encoding a TADG-14  
5 protein selected from the group consisting of: (a) isolated DNA which  
encodes a TADG-14 protein; (b) isolated DNA which hybridizes to  
isolated DNA of (a) above and which encodes a TADG-14 protein; and  
(c) isolated DNA differing from the isolated DNAs of (a) and (b) above  
in codon sequence due to the degeneracy of the genetic code, and  
10 which encodes a TADG-14 protein. Also provided is a vector capable  
of expressing the DNA of the present invention adapted for expression  
in a recombinant cell and regulatory elements necessary for  
expression of the DNA in the cell.
